- Customer Service

Projects

Dar-Farha Real Estate Platform

 dar-farha.com

Technologies: React.js, Next.js, Tailwind CSS, Django, Python, REST Framework, GraphQL

- Developed a responsive real estate platform enabling users to search, filter, and view property listings.
 - Built RESTful APIs using Django and Django REST Framework for user authentication, listings management, and inquiries.
 - Implemented SEO-friendly routing and server-side rendering with Next.js for faster page loads and better discoverability.
 - Used GraphQL for optimize data fetching between frontend and backend.
-

We V Platform – Frontend

 value-platform.com

Technologies: React.js, Vite.js, Bootstrap, Chart.js, Axios, Redux Toolkit

- Designed and developed a dynamic frontend for a self-development platform focused on user value tracking.
- Integrated Chart.js to visualized personal growth metrics and dashboards.
- Applied Redux Toolkit for managing global state and ensuring a smooth user experience.

We V Platform – Backend

Technologies: Django, Python, Django REST Framework

- Created REST APIs to manage user data, personal development entries, and analytical reporting.
 - Built secure user authentication and role-based access system.
 - Ensured scalable backend structure to support future feature expansion.
-

Alef Bookstore (Graduation Project)

 alefstore.vercel.app

 [GitHub Backend](#)

Technologies: React.js, Node.js, MongoDB, Angular (admin), Redux Toolkit, Bootstrap, EmailJS

- Built a full-stack online bookstore with features like book browsing, cart management, and order processing.
 - Developed Angular-based admin dashboard for inventory and user management.
 - Integrated EmailJS to send order confirmations and account notifications.
-

All-In-One Task Management System

 all-in-one.cyparta.com

Technologies: React.js, Node.js, Express.js, MongoDB

- Created a task and project management platform inspired by Jira for team collaboration.
 - Enabled users to create organizations, assign roles, manage tasks, and track progress across boards.
 - Designed a scalable backend with RESTful APIs and implemented role-based permissions for secure operations.
-

Languages

- Arabic (Mother Language)

- English (Advanced)

Certificates

- Programming

- ITI Trainee Using MEARN - Full-stack web development - DevOps
- Certificate Introduction to Software Testing Concepts & Techniques (Mahara-Tech)
- MongoDB Certification Program options for DBA.

- management

- training from CARE to raise awareness, educate young people and combat acts of gender-based violence
- professional advice workshops within the framework of " the Mashwary" project, which UNICEF held
